

SOMIEDO THE CANTABRIAN BROWN BEAR

This trip has a minimum length of three days.

Usually our trips begin and end in Madrid. For other points of departure and return do not hesitate to [contact us](#).

The price of this trip will be determined by the number of people on the excursion, the type of accommodation chosen and the days of the excursion. For more information do not hesitate to [contact us](#).

Recommended season: Spring and autumn are the best time for its observation although they can be seen at all times of the year except in winter.

DESCRIPCIÓN DEL VIAJE:

This is a trip focused mainly on the observation of the Cantabrian Brown Bear.

As Bears are more active at sunrise and sunset, on the way to Asturias we will make a stop in Villafáfila to observe the Great Bustard and then we will go to see a colony of Rook. On this same day we will arrive to Somiedo before sunset to make the first wait for the Cantabrian Brown Bear.

There will be two waits per day in the best observation sites for this emblematic species. Sunrise and sunset are the most propitious moments for its sighting.

The rest of the day there will do excursions to see the Birds that live in this ecosystem and its wonderful landscapes.

In the following link you can see in another similar trip: [Somiedo the Brown Bear](#)
